Investors should note that this strategy invests in emerging markets and such investments may carry risks with failed or delayed settlement and with registration and custody of securities. Companies in emerging markets may not be subject to accounting, auditing and financial reporting standards or be subject to the same level of government supervision and regulation as in more developed markets. Government involvement in the economy may affect the value of investments in certain emerging markets and the risk of political instability may be high. The reliability of trading and settlement systems in some emerging markets may not be equal to that available in more developed markets which may result in problems in realising investments. Lack of liquidity and efficiency in certain of the stock markets or foreign exchange markets in certain emerging markets may mean that from time to time the fund manager may experience difficulty in purchasing or selling holdings of securities.
